

research methods in health pdf

Research comprises "creative and systematic work undertaken to increase the stock of knowledge, including knowledge of humans, culture and society, and the use of this stock of knowledge to devise new applications." It is used to establish or confirm facts, reaffirm the results of previous work, solve new or existing problems, support theorems, or develop new theories.

Dianne Neumark-Sztainer, PhD, MPH, RD is the Principal Investigator for Project EAT and also a Professor and Division Head in the Division of Epidemiology and Community Health. With the help of her colleagues who are working on this study, she wrote the grant proposals for all components of the study, and has been involved in focus groups implementation, survey development, overall study ...

Project EAT - Epidemiology & Community Health Research

Research featured in the latest edition of the NBER Digest finds that the frequency of price changes at multi-channel retailers – those who sell online and in brick-and-mortar stores – increased from 15 percent per month in 2008–10 to almost 30 percent in 2014–17. Frequency of changes was greatest in areas where competition with online retailers such as Amazon was stiffest.
