results of meteorological observations pdf

Meteorology is a branch of the atmospheric sciences which includes atmospheric chemistry and atmospheric physics, with a major focus on weather forecasting. The study of meteorology dates back millennia, though significant progress in meteorology did not occur until the 18th century. The 19th century saw modest progress in the field after weather observation networks were formed across broad ...

This website now functions as a WMO Extranet for the WMO Community also accessible at extranet.wmo.int. It provides an interim solution until a new WMO Community website can be launched. The WMO Cpdb instead is more targeted towards sources for and from members. Below are direct links to WMO Technical Commissions and Programmes as well as other useful links for the Community.

Of all outdoor air pollutants, fine particulate matter (PM 2.5) is the most dangerous for human health (Pope and Dockery, 2006, Pope et al., 2002). Despite the major health risks, economic losses, and threats to the environment that high outdoor PM levels pose to developing nations, outdoor PM pollution is vastly under-monitored in the regions where those efforts are most needed ().
