

saving investment and capital pdf

Interest rates. Classical economics posited that interest rates would adjust to equate saving and investment, avoiding a pile-up of inventories (general overproduction). A rise in saving would cause a fall in interest rates, stimulating investment, hence always investment would equal saving.

A global saving glut (also global savings glut, GSG, cash hoarding, dead cash, dead money, glut of excess intended saving, or shortfall of investment intentions) is a situation in which desired saving exceeds desired investment. By 2005 Ben Bernanke, chairman of the Federal Reserve, the central bank of the United States, expressed concern about the "significant increase in the global supply of ...

Investment or investing means that an asset is bought, or that money is put into a bank to get a future interest from it. Investment is total amount of money spent by a shareholder in buying shares of a company. In economic management sciences, investments means longer-term savings. It is a term used in business management, finance and economics, related to saving or deferring consumption.

There are many different types of investment. Here are some examples: Corporate and government bonds. You basically lend your money to a company or a government in return for interest (don't confuse these with fixed-term bonds, which are basically savings accounts held for a certain period of time).
