Hungry for fresh, exciting science activities based in amazing phenomena? Science Snacks are hands-on, teacher-tested, and use cheap, available materials. Satisfy your curiosity without ever getting full. Don't miss our Special Collections.

Science Snacks: Projects and Activities You Can Do

How To Get Published. The strength of Science and its online journal sites rests with the strengths of its community of authors, who provide cutting-edge research, incisive scientific commentary ...

Science | AAAS

The presence of liquid water at the base of the martian polar caps was first hypothesized more than 30 years ago and has been inconclusively debated ever since. Radio echo sounding (RES) is a suitable technique to resolve this dispute, because low-frequency radars have been used extensively and successfully to detect liquid water at the bottom of terrestrial polar ice sheets.

Radar evidence of subglacial liquid water on Mars | Science

Scientific Explorer Ice Cream Science Kit teaches you how to make your own ice cream! Invent colors and flavors, conduct super cool chemistry experiments to investigate why salt is used in ice cream making and learn how to make ice scream smooth or gritty and how to add fluff to the mixture.

Communicating Scienceâ€™that's what ICE is all about. We are a national center for science educators to develop and disseminate ideas. Our efforts are evident in kits and publications, in programs for students and for teachers, and in research in chemical education.

ice.chem.wisc.edu - Institute for Chemical Education: Overview

THARP & YOUNG "On Ice Cream" is a series of technical short courses, product clinics, and formulation and case study workshops that focus on current and emerging ice cream and related frozen dessert technologies. Practical aspects of formulation and manufacturing are stressed. Over 75 years of combined experience are leveraged.

Stored water as part of the water cycle. The water cycle describes how water moves above, on, and through the Earth. But, in fact, much more water is "in storage" at any one time than is actually moving through the cycle.

An ice age is a long period of reduction in the temperature of the Earth's surface and atmosphere, resulting in the presence or expansion of continental and polar ice sheets and alpine glaciers. Within a long-term ice age, individual pulses of cold climate are termed "glacial periods" (or, alternatively, "glacials" or "glaciations", or colloquially "ice ages"), and intermittent warm periods are ...
