A scuba set is any breathing apparatus that is carried entirely by an underwater diver and provides the diver  
with breathing gas at the ambient pressure. Scuba is an acronym for self-contained underwater breathing  
apparatus. Although strictly speaking the scuba set is only the diving equipment which is required for  
providing breathing gas to the diver, general usage includes the harness by ...

In quantum computing and specifically the quantum circuit model of computation, a quantum logic gate (or  
simply quantum gate) is a basic quantum circuit operating on a small number of qubits. They are the building  
blocks of quantum circuits, like classical logic gates are for conventional digital circuits.. Unlike many classical  
logic gates, quantum logic gates are reversible.

9.SHOP PRACTICES. Knowing about good electronic shop practices begins with introduction to the basic  
tools and test instruments used in electronic repair, production and troubleshooting. It continues with  
"hands-on" activity directed towards learning practical skills such as soldering and de-soldering and making  
connecting leads and cables.
