The cant of a railway track or camber of a road (also referred to as superelevation, cross slope or cross fall) is the rate of change in elevation (height) between the two rails or edges. This is normally greater where the railway or road is curved; raising the outer rail or the outer edge of the road providing a banked turn, thus allowing vehicles to maneuver through the curve at higher speeds ...

Conscience is a cognitive process that elicits emotion and rational associations based on an individual's moral philosophy or value system. Conscience stands in contrast to elicited emotion or thought due to associations based on immediate sensory perceptions and reflexive responses, as in sympathetic central nervous system responses. In common terms, conscience is often described as leading ...

Practicing the Art of Non Reaction Those who read my Website know that I encourage a strict "no contact" discipline for those wanting to recover from narcissistic abuse. I call this a discipline rather than a "rule" because sticking to "no contact" is a discipline. It takes diligence, commitment and focus on the bigger picture.
